The Healthier You Are, The Happier You Are

Neutralize Harmful Radiation of Mobile Phones!

Protect yourself and your loved ones from the harmful effects of electro-smog during mobile phone calls. Mobile phones can emit surprisingly strong EMF especially from the handset.

This is a problem because we hold the telephone so close to our head that travel several inches right into the brain.

It is fantastic product to neutralize the technical radiation for mobile phones and monitors. Zero Impact sticker is a new way to protect you and your from the radiation that is emitted.

How it works:

Zero Impact works in the shape of one closed circle with the diameter of 1.5m and neutralizes the negative radiation caused by mobile phones, monitors etc.

This way we achieve neutral energy, which is not harmful for human being (for health).

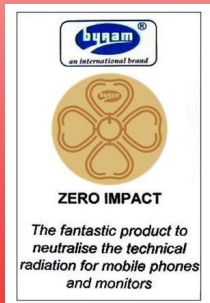

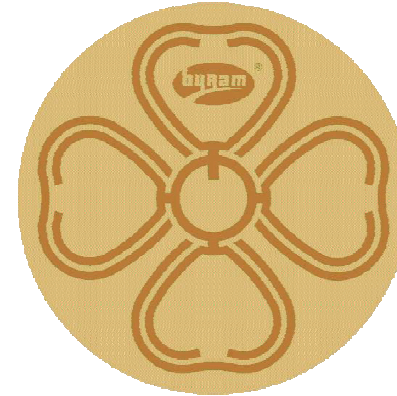

The Healthier You Are, The Happier You Are

How to use:

- ✓ Attach Zero Impact sticker on the back side of mobile phone or near the antenna.
- ✓ To use on monitors put the Zero Impact on the front side (on the housing).
- ✓ Zero Impact neutralize the technical radiation. Take off the protection paper from the sticker and attach the Zero Impact on the device.

The Healthier You Are, The Happier You Are

The specific matter of Zero Impact has a relief structure with a metallic effect. The basis of the sticker is non colored golden Polyvinyl foil in several layers and the metallic effect is achieved by the specific production process.

You can't apply the sticker on: wax, silicon, teflon and neoprene. You can apply the sticker on all other even or light bended surfaces. The sticker can be exposed to maximal 60 degrees temperature - on which the sticker still will keep it's ground shape (function is permanent!).

The Healthier You Are, The Happier You Are

Thank You
